Case History, Continued

The PF4S combines the Cozzoli PF4 Inline Powder Filler with the RS400 Stoppering system. Although Fort Dodge has a 4 head, monoblock models are available with up to 12 heads.

Additional Features

316 Stainless Steel
Stopper Contact Parts

2 Sets of Dosing Heads

Low Vacuum Sensor on RS400

The dual-level powder supply hopper and agitator design provides for the high level of accuracy and repeatability. The powder pathway is totally enclosed to prevent external contamination, while an automatic filter purge eliminates filter clogging and waste.
