

RFPC – ROTARY FILLING, PLUGGING AND CAPPING

This versatile monoblock machine can fill, plug and screw cap up to four containers at a time with speeds up to 200 containers per minute, performing each of the operations in synchronization on a common frame—all in less than 45 sq. ft. (4.2m²) of floor space. It's a frequent choice for use in Class 100 clean rooms where the efficient use of space is of prime importance.

The RFPC is PLC controlled and features a stainless steel exterior and all liquid contact parts of 316L stainless steel. It has a raised sanitary conveyor that transports containers to and from the filling/plugging/capping area and comes with a no plug/no cap detection system. Optional features include servo driven torque heads, over/under torque container rejects system, statistical torque value reporting, no plug/no cap reject system and make up/back up detection systems.

The low profile frame, remote plug and cap pick up stations and open flow through design of the central starwheel are instrumental in enhancing the passage of laminar air flow and minimizing turbulence. The only moving parts over open containers are the filling nozzles. The RFPC series can handle various container shapes and sizes and a wide range of products from aqueous to heavy oils, suspensions and creams.

LIQUID CONTACT MATERIALS

- Set of SS 316L Custom Designed Nozzles
- Set of SS 316L Slide Valves and syringes
- Tygon Intake and Delivery Tubing

PLUG CONTACT MATERIALS

316 Stainless Steel Pick Up Rods, Feed Track, Vibratory Feed Bowl and Collets.

CAP CONTACT MATERIALS

304 Stainless Steel Pick Up Rods, Feed Track, Vibratory Feed Bowl, Pre-Torque Collet(s), and Torque Collet(s) with Non-Metallic Inserts.

FEATURES

- One Set of Container Handling Changeparts
- 303/304 Stainless Steel Exterior
- 7' Long Sanitary Conveyor
- Main Control Console Component Box
- Allen-Bradley Compact/Control Logix PLC with Panel View 600 HMI
- 1 Hp DC Drive
- Plug and Cap Make Up and Back Up Detection
- Plug Vibratory Feed Bowl
- Cap Vibratory Feed Bowl
- No Plug No Cap Detection
- Left to Right Container Flow
- Lexan Enclosure
- Operation and Maintenance Manual

OPTIONS

- Electronic Digital Vial Counter
- Remote access Programming
- Right to Left Container Flow Feature
- Spare Parts Kit
- Down Vial Eliminator
- Reject Station
- Container Make Up and Back Up Detection
- Front Panel Electronic Fill Volume Adjustment
- Filler Bypass System
- Servo Driven torquing Heads
